

**MICHIGAN DEPARTMENT OF CIVIL SERVICE
JOB SPECIFICATION**

LABORATORY EVALUATION SPECIALIST

JOB DESCRIPTION

Employees in this complete or oversee a variety of assignments to determine and assure that laboratories performing tests on human specimens within the state are in compliance with federal statutory and regulatory standards.

There are four classifications in this job.

Position Code Title – Laboratory Evaluation Specialist-E

Laboratory Evaluation Specialist 9

As a trainee, the employee carries out a range of professional laboratory evaluation specialist assignments while learning the methods of the work.

Laboratory Evaluation Specialist 10

The employee performs an expanding range of professional laboratory evaluation specialist assignments in a developing capacity.

Laboratory Evaluation Specialist P11

The employee performs a full range of professional laboratory evaluation specialist assignments in a full functioning capacity. Considerable independent judgement is used to make decisions in carrying out assignments that have significant impact on services or programs. Guidelines may be available, but require adaptation or interpretation to determine appropriate courses of action.

Position Code Title – Laboratory Evaluation Specialist-A

Laboratory Evaluation Specialist 12

The employee may function as a lead worker or senior worker. At this level, employees are responsible for overseeing the work assignments of other professionals or have regular assignments that have been recognized by Civil Service as having significantly greater complexity than those assigned at the experienced level in the series.

JOB DUTIES

NOTE: The job duties listed are typical examples of the work performed by positions in this job classification. Not all duties assigned to every position are included, nor is it expected that all positions will be assigned every duty.

Surveys and inspects laboratory facilities and procedures, with emphasis on qualifications and responsibilities of staff as they relate to quality assurance plans, quality control procedures, corrective and remedial action plans, and other control measures to assure the quality of work performed.

LABORATORY EVALUATION SPECIALIST

PAGE NO. 2

Prepares survey and inspection reports outlining deficient practices; reviews and evaluates proposed plans for corrections; recommends certifications and sanctions based on findings and enforcement standards.

Determines that laboratories are enrolled in approved proficiency testing programs covering all regulated analytes and tests performed; recommends sanctions based on federal standards for unsatisfactory proficiency testing results.

Determines that laboratories have adequate policies and procedures to ensure that accurate and reliable test results are reported for use by physicians and other authorized personnel.

Provides consultation to laboratories and blood collection and transfusion facilities to assist them in upgrading their services and personnel.

Maintains lists of certified laboratories for public use.

Serves as liaison with appropriate federal agencies involved with laboratory certification.

Keeps informed on new developments in laboratory methods, procedures and equipment, changes in state and federal laws and regulations, and developments in other states.

Maintains records and prepares reports and correspondence related to the work.

May perform related essential functions appropriate to the class and other non-essential functions as required.

Additional Job Duties

Laboratory Evaluation Specialist 12 (Lead Worker)

Oversees the work of professional staff by making and reviewing work assignments, establishing priorities, coordinating activities, and resolving related work problems.

Laboratory Evaluation Specialist 12 (Senior Worker)

Performs on a regular basis professional laboratory evaluation specialist assignments which are recognized by Civil Service as more complex than those assigned at the experienced level.

JOB QUALIFICATIONS

Knowledge, Skills, and Abilities

NOTE: Some knowledge in the area listed is required at the entry level, developing knowledge is necessary at the intermediate level, considerable knowledge is required at the experienced level, and thorough knowledge is required at the advanced level.
